

# 3CE Global Trade Data. Transact with the world.

Mission critical customs and regulatory compliance information is seldom found in a single, easily accessible location, and rarely comes in a format that is compatible with enterprise systems - exposing organizations involved in cross-border trade to exorbitant administrative costs and unacceptable levels of risk.

3CE maintains comprehensive, up-to-date duty (preferential and otherwise), tax, and regulatory trade data for 160 countries accounting for 98% of world trade. 3CE also provides integrated high-level market access information, allowing traders see the list of countries with the lowest barriers to entry for their products and countries that are eligible for the lowest rates of duty in an instant.

All 3CE tariff and regulatory trade compliance data is available on-demand via web-services or seamlessly linked to our web-based tools.

Because we are a trusted service provider to many governments, we are able to provide you with the most reliable and timely tariff and trade compliance data possible
